Experience

Software Development Job Simulation | Forage & Datacom

Jul 2026 - Aug 2026

- Completed practical software development tasks simulating real-world enterprise engineering workflows.
- Reviewed software components to assess code quality, maintainability, and system efficiency.
- Diagnosed software defects and implemented bug fixes to improve application stability.
- Validated software functionality through testing and debugging to ensure reliable application behavior.

Projects

Grocery Os -- Full-Stack Grocery Store Management Platform | [GitHub](#) | [Vercel](#)

Jul 2026 - Aug 2026

- Architected a full-stack grocery management platform with dedicated customer and administrator workflows.
- Hardened authentication and authorization using JWT, Bcrypt, role-based access control, and input validation.
- Exposed RESTful APIs for products, inventory, orders, coupons, store settings, and customer management.
- Orchestrated an admin dashboard to streamline product, inventory, and store-data management.
- Scaled the application architecture to support multiple grocery stores through a SaaS-based design.
- Tech used - React, TypeScript, Node.js, Express.js, Prisma, PostgreSQL, Tailwind CSS, JWT

Civic Pulse – Citizen Feedback Analysis Dashboard | [GitHub](#) | [Vercel](#)

Jun 2026 - Jul 2026

- Crafted a full-stack citizen feedback platform supporting images, location, priority, and anonymous submissions.
- Applied rule-based NLP for sentiment, emotion, urgency, spam, and topic classification.
- Enforced secure user and administrator workflows through JWT authentication and role-based access control.
- Visualized feedback insights through interactive dashboards for triage, trend analysis, and recurring civic issues.
- Deployed the application using Vercel, Render, and MongoDB Atlas.
- Tech used – React, TypeScript, Node.js, Express.js, MongoDB, JWT, Tailwind CSS.

Training

AI-Driven MERN Stack Bootcamp | LPU Centre of Professional Enhancement

Jun 2026 - Jul 2026

- Developed a full-stack platform supporting citizen feedback with images, location, priority, and anonymity.
- Implemented rule-based NLP for sentiment, emotion, urgency, spam, and topic classification.
- Integrated JWT authentication and role-based access control to secure user and administrator workflows.
- Configured MongoDB-based data handling for efficiently managing citizen feedback and classification results.

Certifications

Oracle AI Database Certified Foundations Associate | Oracle

Aug 2026

Data Structure and Algorithm | Iamneo

Jun 2026

Programming Using C++ | Infosys

Aug 2025

Technical Skills/ Summary

Programming: Java, C++, Python, JavaScript

CS Fundamentals: Data Structures & Algorithms, Object-Oriented Programming, Problem Solving, Complexity Analysis

Web: HTML, CSS, JavaScript, React.js, Node.js, Express.js, REST APIs

Databases: SQL / MySQL, PostgreSQL, MongoDB

Tools: Git, GitHub, Vite, Prisma, MongoDB Atlas, Tailwind CSS, TanStack Query, Chart.js

Education

Lovely Professional University Punjab

2024 – 2028

Bachelor's Computer Science and Engineering — CGPA: 8.01

Phagwara, Punjab

Oxford Public School

Intermediate

St. Joseph's School

Matriculation

2022 – 2023

Jamui, Bihar

2020 – 2021

Jamui, Bihar
