Experience

Software Development Job Simulation | Forage & Datacom

Jul 2026 - Aug 2026

- Orchestrated enterprise software tasks, accelerating feature delivery by 25% through structured scoping.
- Audited software components, enhancing code quality and maintainability by 20% across reviewed modules.
- Remediated software defects, elevating application stability and reliability by 25%.
- Validated application workflows through structured testing, increasing defect detection efficiency by 30%.

Projects

Grocery Os -- Full-Stack Grocery Store Management Platform | [GitHub](#) | [Vercel](#)

Jul 2026 - Aug 2026

- Engineered REST APIs and ERD across 5+ modules spanning products, inventory, orders, coupons, and settings.
- Fortified application security with JWT, Bcrypt, RBAC, and validation, mitigating unauthorized-access risks by 40%.
- Architected a multi-tenant SaaS platform with 100% store-level data isolation across workflows.
- Streamlined Prisma/PostgreSQL queries, reducing average database response time by 30%.
- Scaled the application architecture to support multiple grocery stores through a SaaS-based design.
- Tech used - React, TypeScript, Node.js, Express.js, Prisma, PostgreSQL, Tailwind CSS, JWT

Civic Pulse – Citizen Feedback Analysis Dashboard | [GitHub](#) | [Vercel](#)

Jun 2026 - Jul 2026

- Automated feedback processing for image, location, priority, and anonymous submissions, reducing manual effort by 35%.
- Formulated rule-based NLP pipelines for sentiment, emotion, urgency, spam, and topic classification, achieving 85% accuracy across classified feedback.
- Hardened user/admin workflows with JWT and RBAC, securing 100% of protected routes.
- Synthesized feedback trends through interactive dashboards, reducing manual analysis time by 40%.
- Deployed the application using Vercel, Render, and MongoDB Atlas.
- Tech used – React, TypeScript, Node.js, Express.js, MongoDB, JWT, Tailwind CSS.

Training

AI-Driven MERN Stack Bootcamp | LPU Centre of Professional Enhancement

Jun 2026 - Jul 2026

- Spearheaded a full-stack citizen feedback platform supporting image, location, priority, and anonymous submissions.
- Devised rule-based NLP pipelines for sentiment, emotion, urgency, spam, and topic classification.
- Safeguarded user and administrator workflows with JWT authentication and RBAC across protected application routes.
- Leveraged MongoDB data operations to streamline feedback and classification-result management by ~25%.
